PROFESSIONAL SUMMARY

Senior Machine Learning Engineer and Tech Alchemist with 17+ years of experience integrating cutting-edge ML solutions with microservices and cloud technology. Specializing in Agentic AI (Model Context Protocol, Spring AI, LangGraph), ML-driven forecasting, workflow orchestration, Cloud, Microservices, Service Oriented Architecture (SOA), Automation, Core Java, RESTful Webservices, DevOps, and Ansible. Former Google and Oracle engineer with a proven track record of architecting solutions that drive operational efficiency and deliver premier user experiences.

CORE COMPETENCIES

AI / ML ENGINEERING

Agentic AI | Model Context Protocol (MCP) | Spring AI | LangGraph | A2A | CodeAct | RAG
Prompt Engineering | LLM-Assisted Development | MLX Fine-Tuning (LoRA/QLoRA)
Forecasting (N-BEATS, Prophet) | ML Pipelines

LANGUAGES & FRAMEWORKS

Java | Python | JavaScript | TypeScript | Spring Boot | Angular | React | FastAPI

CLOUD & DEVOPS

Google Cloud Platform | AWS | Oracle Cloud | Docker | Kubernetes | Jenkins | Ansible | CI/CD
Infrastructure as Code

ARCHITECTURE & DATA

Microservices | Netflix OSS | REST APIs | SOA | Apache Lucene | Oracle | MySQL | SQL Server
IBM DB2 | PostgreSQL | Elasticsearch

PROFESSIONAL EXPERIENCE

Senior Machine Learning Engineer

Sep 2022 – Present

WORKDAY

Santa Clara, California, United States

Software Engineer, Sep 2022 – Feb 2026 · promoted to Senior ML Engineer, Feb 2026

Engineer on an enterprise planning platform, focused on ML-driven forecasting, workflow automation, and agentic AI systems.

- ▶ Architected and lead-developed an end-to-end predictive forecasting (ML) application: forecast definitions using historical actuals as reference and a target planned version as output, selectable forecasting models (N-BEATS, Prophet), and dispatch to an ML pipeline that computes forecasts and writes results back to the planned version.
- ▶ Built the forecasting scheduler as phase two: create/update and pause/resume schedules, timezone handling, OpenAPI/Swagger documentation, and expanded automated test coverage.
- ▶ Designed and led a lightweight, decoupled process/workflow engine powering configurable enterprise workflows — defining its core interfaces, lifecycle operations, and extensibility model.
- ▶ Pioneered AI-agent orchestration with the Model Context Protocol (MCP) and Spring AI — server/host integrations exposing enterprise workflow APIs as tools for AI assistants; the host design was adopted as an architectural baseline by the owning team.
- ▶ Champion of AI-assisted engineering — applying LLM tooling (Claude, GPT-4, Cursor) to design, prototyping, code/test generation, and debugging, and evangelizing AI-first workflows across the team.

Principal Member of Technical Staff

Jan 2022 – Sep 2022

ORACLE

Seattle, Washington, United States

Contributed to Oracle's cloud infrastructure and enterprise solutions as a Principal Member of Technical Staff.

Software Engineer

GOOGLE

May 2021 – Dec 2021

Warsaw, Mazowieckie, Poland

Managed customer problems through effective diagnosis and resolution. Worked on Google Cloud Platform products and collaborated with multiple product and engineering teams.

Software Engineering Lead

JPMORGAN CHASE & CO.

Dec 2016 – May 2021

Hyderabad, Telangana, India

Software Engineering Lead / Architect for an org-wide coding-less Automation Suite for Production Management. Led a team of developers working with Ansible, Netflix Conductor, Spring Boot, Docker / Kubernetes, and RESTful APIs.

Senior Consultant

VIRTUSA POLARIS

Apr 2016 – Dec 2016

Hyderabad, Telangana, India

Senior System Consultant and project lead for 10 associates, organized into Application Support, DBA Support, and Server Support teams providing complete end-to-end support for all Alere Apollo Platform applications.

Senior System Analyst – Project Lead

VALUELABS

Jan 2014 – Apr 2016

Malaysia

Project lead for 7 projects, including 5 support projects with regular monitoring and change-request handling.

- ▶ WebSphere DataPower Migration Lead — led the migration of services from Xi50 DataPower to the latest Xi52 DataPower appliances.
- ▶ Architect / designer for the PDPA project — developed the entire application single-handedly, applying Java object-oriented design principles.

Analyst – Systems Development

VERIZON DATA SERVICES INDIA

Jan 2012 – Jan 2014

Hyderabad, Telangana, India

Analyst – Systems Development, Secondary Release Lead, and Module Lead.

- ▶ Gathered requirements from onsite coordinators and delegated to / worked with the offshore team for successful deliveries.
- ▶ Participated effectively in design and implementation discussions; provided production and testing support whenever required.
- ▶ Testing, debugging, defect fixing, and performance tuning of the codebase; worked closely with CVS & SVN to avoid merge conflicts and keep the history clean.

Systems Engineer

TATA CONSULTANCY SERVICES

Feb 2009 – Dec 2011

Chennai, Tamil Nadu, India

Developer and Backup Project Lead for a team of 7 at offshore.

OPEN SOURCE & INDEPENDENT WORK

MY-Manus · [Agentic AI](#)

Open-source Manus-style AI agent platform on the CodeAct architecture — Docker-sandboxed Python execution, MCP tool discovery, full session replay.

MAOS · [Multi-Agent Orchestration](#)

Config-driven multi-agent orchestration: LangGraph supervisor, MCP tool plane, A2A agent discovery, OpenAI-compatible API.

TestRail MCP Server · [AI Tooling](#)

Spring Boot + Spring AI MCP server exposing 101 TestRail operations through 4 Lucene-backed meta-tools with local-only credentials.

MLX Fine-Tuning Pipelines · [Local ML](#)

LoRA/QLoRA fine-tuning of open-weight models (QwQ-32B, Qwen) on Apple Silicon for enterprise Java codebases — private, zero cloud cost.

Conductor Boot & Spring Boot Starter for Conductor · [Maven Central](#)

Published artifacts: Spring Boot wrapper of Netflix Conductor Server (embedded security, database, Elasticsearch) and a Conductor OSS starter.

Published ML Models · [Hugging Face](#)

StarCoder2-3B (base & instruction-tuned), Flowable documentation models (Llama / Qwen), Netflix Conductor documentation model.

Automation & Workflow OSS · [GitHub](#)

conductor-ng-ui, ansible-playbook-generator-ui, ansible-playbook-json2yaml, ansible-docs-boot, and more.

Publications · [Medium](#) / [LinkedIn](#)

"Netflix Conductor — Spring Boot Wrapper" · "Bridging Realms: Humans and AI" · "Scientific Proof of God. Possible?"
